Starting from \$0.60

Quick Overview

Fildena 50mg/100mg is the brand name for Sildenafil Citrate a tablet used in improving the problem of erectile dysfunction (ED) in men. Erectile dysfunction is defined as the failure to maintain an erection adequate for sexual activity. **Sildenafil Citrate is a phosphodiesterase (PDE) inhibitor**, which function by escalating blood flow to the male organs during intercourse, resulting in a firm erection.

Brief description about Fildena 25mg, 50mg, 100mg and 150mg Medication:

Fildena 50 mg 100 mg contains Sildenafil citrate is also recommended in patients suffering from pulmonary arterial hypertension (PAH) to better their capacity to exercise and reduce shortness of breath. It is sometimes also utilized to treat Raynaud's disease and in combination with other drugs to treat prostate cancer. It was initially used in the management of hypertension and circulatory ailments, until it was found that it produced erections.

Drug Interactions of Fildena 25mg, 50 mg, 100 mg and 150mg.

- Nitrate drugs such as amyl nitrate or "poppers" as it can cause a sudden and serious drop in blood pressure, making you feel dizzy and faint.
- St. John's wort.
- Drugs used in the management of Hepatitis C.
- HIV/AIDS pills: Ritonavir.
- Antibiotics: Erythromycin.
- Cimetidine.
- Alpha blockers such as Terazosin combined with this drug can also lead to decrease in blood pressure.
- Herbal medications and dietary supplements.
- rugs used in the management of Seizures: Carbamazepine.
- Drugs used to deal with Tuberculosis: Isoniazid.
- Drugs used to treat fungal infections: Fluconazole.

Fildena 50mg should be stored under hygienic conditions and away from the reach of children and pets.

Contraindications of Fildena 25 mg, 50 mg, 100 mg and 150mg-

- Fildena is not be used by females and children;
- Do not take Fildena if you are allergic to Sildenafil citrate;

Fildena 50mg should be avoided, if you suffer from cardiovascular problems.
