## Buy Viagra 150 mg Online

Viagra 150mg is one of the best medications used in the management of the most unpleasant sensual condition of a man called erectile dysfunction. Main purpose of Viagra 150mg is to satisfy the sensual needs of a man without producing any other complications. This medicine works magnificently by helping men to obtain a strong erection naturally so that they can perform in bed while making love. Viagra 150mg encloses a generic drug called Sildenafil citrate.

### How does Generic Viagra 150mg act?

Sildenafil citrate is a kind of PDE-5 inhibitor that inhibits the working of PDE-5 enzymes and blocks the further degradation of cGMP. Sensual arousal causes the discharge of NO (nitric oxide) in the body and the release of NO causes the creation of cGMP. A surplus mounted quantity of cGMP in the male genital area causes the relaxation and dilation of blood vessels present in the male genital area. This augments the inflow of blood to the male genital area resulting in an erection.

### What is the method of intake of Viagra 150 mg?

Viagra 150mg is commercially accessible in an oral tablet formulation. Take one Viagra 150mg tablet via the oral route at least 60 minutes prior to intimate sessions, with a colossal quantity of water. The effect of generic Sildenafil citrate last for 4 to 5 hours, so maintains a gap of 24 hours between two doses of Viagra medication. Avoid the intake of fatty meals along with Viagra medication; otherwise, this may affect the absorption of this medicine.

### Who should not use Viagra 150 mg?

The use of Viagra 150mg is strictly prohibited under certain medical conditions:

- Severe hypotension
- Severe hepatic or renal dysfunctions
- Hereditary degenerative retinal disorder
- Pulmonary veno occlusive dysfunction
- Hypersensitive reactions with generic Sildenafil citrate or others PDE-5 inhibitors

### Are there any noxious effects of Viagra 150mg?

A person may feel noxious effects while relying on the treatment of Viagra 150mg such as diarrhea, dizziness, headache, muscle pain, nausea, sore throat, blocked or runny nose, heartburn, facial flushing, and vomiting.

### Are there any safety measures to be followed while using Viagra 150mg?

- You should avoid the intake of alcoholic beverages or recreational drugs while relying on the treatment of Viagra 150mg.
- You should not use Viagra 150mg if you are relying on the treatment of nitrate-containing medications to treat your chest pain or angina.
- You should not use Viagra 150mg if your age is less than 18 years.
- You should not use Viagra 150mg if you have a history of the painful or prolonged erection of more than 4 hours.
